#### **Feasibility Study Survey**

The Research for Patient Benefit (RfPB) programme is collecting data related to previously identified feasibility studies. The purpose of this review is to gain a greater understanding of the benefits of funding feasibility studies, and includes tracking the projects that included feasibility work. RfPB is interested in collecting information that will help the programme team better understand the trajectory that feasibility projects tend to take after the RfPB work is completed, particularly with regard to where researchers apply for further funding.
